File

src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts

Description

Component for admin to delete a user

Implements

[OnInit](#)

Metadata

selector app-admin-delete-user-dialog
styleUrls ./admin-delete-user-dialog.component.scss
templateUrl ./admin-delete-user-dialog.component.html

Index

Properties

- Public [data](#)
- Public [dialogRef](#)

Methods

- [ngOnInit](#)
- [onNoClick](#)

Constructor

constructor(dialogRef: [MatDialogRef](#), data: [any](#))
Defined in [src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts:13](#)

Constructor in which we inject our services and different elements

Parameters :

Name	Type	Optional
dialogRef	MatDialogRef<AdminDeleteUserDialogComponent>	No
data	any	No

Methods

ngOnInit

ngOnInit ()
Defined in [src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts:29](#)

Start when the component inits

Returns : [void](#)

onNoClick

onNoClick()

Defined in [src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts:35](#)

To close modal

Returns : [void](#)

Properties

Public data

Type : [any](#)

Decorators :

@Inject (MAT_DIALOG_DATA)

Defined in [src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts:23](#)

variable for store the data for modal

Public dialogRef

Type : [MatDialogRef<AdminDeleteUserDialogComponent>](#)

Defined in [src/app/components/modals/admin-delete-user-dialog/admin-delete-user-dialog.component.ts:19](#)

```
import { Component, OnInit, Inject } from '@angular/core';
import { MatDialogRef, MAT_DIALOG_DATA } from '@angular/material/dialog';
```

```
/**
 * Component for admin to delete a user
 */
@Component({
  selector: 'app-admin-delete-user-dialog',
  templateUrl: './admin-delete-user-dialog.component.html',
  styleUrls: ['./admin-delete-user-dialog.component.scss']
})

export class AdminDeleteUserDialogComponent implements OnInit {

  /**
   * Constructor in which we inject our services and different elements
   */
  constructor(
    public dialogRef: MatDialogRef<AdminDeleteUserDialogComponent>,
    /**
     * variable for store the data for modal
     */
    @Inject (MAT_DIALOG_DATA) public data: any
  ) { }

  /**
   * Start when the component inits
   */
  ngOnInit() {

  }

  /**
   * To close modal
   */
  onNoClick(): void {
    this.dialogRef.close();
  }
}
```

```
<div id="containerModal">
  <h1 mat-dialog-title>Are you sure about deleting:</h1>
  <div mat-dialog-content>
    <h4>{{ data.UserName }}</h4>
  </div>
  <div class="buttContainer">
    <button class="cancel" mat-button [mat-dialog-close]="">No Thanks</button>
    <button mat-button [mat-dialog-close]="data.userId" cdkFocusInitial>
      Delete
    </button>
  </div>
</div>
```

```
./admin-delete-user-dialog.component.scss

#containerModal {
  font-family: "B612";
}

#containerModal h1 {
  color: #00a23d;
  font-size: 1.5rem;
}

#containerModal button {
  outline: none;
  background-color: #f3d403;
  border: none;
  border-radius: 10px;
  border: 2.5px solid #00a23d;
  padding: 1.5vw;
  font-size: 0.8rem;
}

.buttContainer {
  padding-top: 2vw;
  display: flex;
  justify-content: space-between;
}

#containerModal button:hover {
  background-color: #cc4224;
}

.cancel {
  background-color: #2a75b3 !important;
}

@media (min-width: 992px) {
  #containerModal h1 {
    font-size: 2.5rem;
  }

  #containerModal button {
    font-size: 1rem;
    padding: 0.5vw;
  }
}
```
