- Public Optional [strength](#)
- Public Optional [totalPoints](#)
- Public Optional [weight](#)
- Public Optional [work](#)

Constructor

constructor(idHero?: [number](#), heroName?: [string](#), image?: [string](#), intelligence?: [number](#), strength?: [number](#), speed?: [number](#), durability?: [number](#), power?: [number](#), combat?: [number](#), fullName?: [string](#), placeOfBirth?: [string](#), publisher?: [string](#), alignment?: [string](#), firstApperance?: [string](#), gender?: [string](#), race?: [string](#), height?: [string](#), weight?: [string](#), eyeColor?: [string](#), hairColor?: [string](#), work?: [string](#), biography?: [string](#), createDate?: [Date](#), totalPoints?: [number](#))

Defined in [src/app/models/hero.ts:5](#)

Constructor

Parameters :

Name	Type	Optional
idHero	number	Yes
heroName	string	Yes
image	string	Yes
intelligence	number	Yes
strength	number	Yes
speed	number	Yes
durability	number	Yes
power	number	Yes
combat	number	Yes
fullName	string	Yes
placeOfBirth	string	Yes
publisher	string	Yes
alignment	string	Yes
firstApperance	string	Yes
gender	string	Yes
race	string	Yes
height	string	Yes
weight	string	Yes
eyeColor	string	Yes
hairColor	string	Yes
work	string	Yes
biography	string	Yes
createDate	Date	Yes
totalPoints	number	Yes

Properties

Public Optional alignment

Type : [string](#)

Defined in [src/app/models/hero.ts:62](#)

character's aligment e.g. Good

Public Optional biography

Type : [string](#)

Defined in [src/app/models/hero.ts:98](#)

character's biography

Public Optional combat

Type : [number](#)

Defined in [src/app/models/hero.ts:46](#)

character's combat points

Public Optional createDate

Type : [Date](#)

Defined in [src/app/models/hero.ts:102](#)

insertion date in the bd

Public Optional durability

Type : [number](#)

Defined in [src/app/models/hero.ts:38](#)

character's durability points

Public Optional eyeColor

Type : [string](#)

Defined in [src/app/models/hero.ts:86](#)

character's eyes color

Public Optional firstApperance

Type : [string](#)

Defined in [src/app/models/hero.ts:66](#)

character's first Apperance e.g. 1st Marvel comic

Public Optional fullName

Type : [string](#)

Defined in [src/app/models/hero.ts:50](#)

character's full name

Public Optional gender

Type : [string](#)

Defined in [src/app/models/hero.ts:70](#)

character's gender

Public Optional hairColor

Type : [string](#)

Defined in [src/app/models/hero.ts:90](#)

character's hair color

Public Optional height

Type : [string](#)

Defined in [src/app/models/hero.ts:78](#)

character's height e.g. 30cm

Public Optional heroName

Type : [string](#)

Defined in [src/app/models/hero.ts:18](#)

character's name

Public Optional idHero

Type : [number](#)

Defined in [src/app/models/hero.ts:14](#)

character's identifier

Public Optional image

Type : [string](#)

Defined in [src/app/models/hero.ts:22](#)

image is a URL with the Hero image

Public Optional intelligence

Type : [number](#)

Defined in [src/app/models/hero.ts:26](#)

character's intelligence points

Public Optional placeOfBirth

Type : [string](#)

Defined in [src/app/models/hero.ts:54](#)

character's place of birth

Public Optional power

Type : [number](#)

Defined in [src/app/models/hero.ts:42](#)

character's power points

Public Optional publisher

Type : [string](#)

Defined in [src/app/models/hero.ts:58](#)

character's publisher e.g. Marvel, Dc

Public Optional race

Type : [string](#)

Defined in [src/app/models/hero.ts:74](#)

character's race

Public Optional speed

Type : [number](#)

Defined in [src/app/models/hero.ts:34](#)

character's speed points

Public Optional strength

Type : [number](#)

Defined in [src/app/models/hero.ts:30](#)

character's strength points

Public Optional totalPoints

Type : [number](#)

Defined in [src/app/models/hero.ts:106](#)

total stats points

Public Optional weight

Type : [string](#)

Defined in [src/app/models/hero.ts:82](#)

character's weight e.g. 30Kg

Public Optional work

Type : [string](#)

Defined in [src/app/models/hero.ts:94](#)

character's work

```
export class Hero {  
    /**  
     * Constructor  
     */  
    constructor(  
        /**  
         * character's identifier  
         */  
        public idHero?: number,  
        public placeOfBirth?: string,  
        public power?: number,  
        public publisher?: string,  
        public race?: string,  
        public speed?: number,  
        public strength?: number,  
        public totalPoints?: number,  
        public weight?: string,  
        public work?: string,  
    ) {}  
}
```

```

/**
 * character's name
 */
public heroName?: string,
/**
 * image is a URL with the Hero image
 */
public image?: string,
/**
 * character's intelligence points
 */
public intelligence?: number,
/**
 * character's strength points
 */
public strength?: number,
/**
 * character's speed points
 */
public speed?: number,
/**
 * character's durability points
 */
public durability?: number,
/**
 * character's power points
 */
public power?: number,
/**
 * character's combat points
 */
public combat?: number,
/**
 * character's full name
 */
public fullName?: string,
/**
 * character's place of birth
 */
